What the Pros Know

Don't apply if floor surface temperature is less than 45° F. Powdering will result. Allow extra curing time in humid conditions. Rushing coats will cause recoat disturbance and dulling. Don't overwork finish - just spread evenly and allow to dry. Apply finish only with a clean finish mop - never use a cleaning mop. See label for complete directions and use only as directed.

Description

An easy to use high solids acrylic floor finish designed for high traffic areas where high gloss and durability are critical. An excellent product for damp mopping and spray buffing with any speed buffing machine. Highly responsive formula - compatible with 175-1500 rpm equipment. Ideal for use in supermarkets and department stores.

Directions

Wear safety equipment recommended on MSDS, place Wet Floor Signs and read all directions and cautions prior to beginning your work.

Apply 2-3 or more even, medium coats (depending on floor condition and desired gloss level) to a clean floor using a clean finish mop. Let dry to touch between

MAINTENANCE:

- Dust mop or sweep daily, and prior to machine
- buffing or burnishing. Wet clean daily with Triple S POWER PLAY Neutral Floor cleaner. Use a damp mop or automatic

BUFFING OR BURNISHING:

coats - about 30 minutes.

- For 175-300 rpm Spray Buffing use Triple S TURN AROUND Spray Buff and a red pad.
- For 1500 rpm Spray Buffing use Triple TURN AROUND Spray Buff and a Triple S Red 40-D pad or equivalent red buffing pad. For 1500-3000 rpm Battery or Cord Electric Dry Burnishing,
- use a Triple S UHS 100-D pad or equivalent aqua burnishing pad.

RECOATING:

Clean thoroughly. Dry Mop. Scrub with a solution of Triple \boldsymbol{S} PROPEL All Purpose Cleaner. Rinse well and let dry. Apply 2 or more coats of Triple S PACERTM High Solids Floor Finish.

Following a planned maintenance schedule will prolong the life of your floor finish. Extending the life of your floor finish extends the time between required "scrub & recoats" and "strip outs", reducing overall labor cost.

PACERTM exceeds the minimum slip resistance requirements for floor finishes when tested in accordance with ASTM 2047-82 (UL test procedure).
